FILTERING CARTRIDGES WITH COMPRESSION SEALING

3D drawings are available on vuototecnica.net

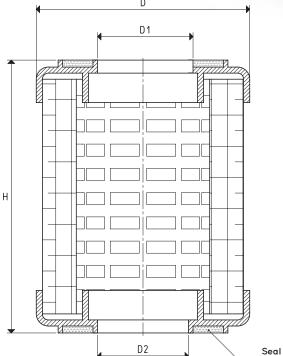

The filtering cartridges described on this page, once installed on their container, are able to retain the impurities and dust contained in the sucked fluid, interfering with the vacuum pump or generator flow rate in a negligible manner.

They are produced with different materials that can be identified with the following abbreviations:

- Series SP. Pleated paper filtering cartridge with compression sealing.
- Series SS. Pleated polypropylene mesh filtering cartridge with compression sealing.
- **Series SA**. AISI 304 stainless steel mesh filtering cartridge with compression sealing.

The number after the item indicates the length in inches of the filtering cartridge.

Item	D Ø	D1 Ø	D2 Ø	Н	Cartridge length	For container item	Level of filtration micron
